Microdermabrasion

Microdermabrasion is an effective, gentle way to exfoliate the outermost layers of the skin to help reveal softer, smoother, more vibrant skin. It has been proven to increase the production of collagen and elastin. Microdermabrasion is safe for all skin types and tones. Beneficial for sun damaged skin, some forms of acne, enlarged pores and oily skin. You will have a smooth, glowing skin texture and appearance.

Chemical Peels

Light gentle peels like, glycolic green peel, salicylic and medium grade peels are used to dissolve the outermost layer of dead skin cells to reveal healthier smoother skin beneath. Overall, the final result will be plump, hydrated and ultra-soft skin. Experience our relaxing and gentle peels with the discomfort, redness, recovery time of the past. A patch test is done 24 hours prior. Expect some down time within a week.

Photo Facial (IPL)

Photo facial gently delivers precise amounts of light energy through the skin's surface to stimulate the production of collagen. As the new collagen forms, it softens the appearance of aging skin. Skin rejuvenation encompasses several different categories of skin treatments; the removal of pigmented lesions, the removal of vascular lesions, the improvement of skin texture and tone, and the smoothing of lines and wrinkles. Photo facial treatments restore a more youthful appearance and improve skin texture without any downtime – allowing you to return to work or leisure activities immediately.

Eyelash Extensions

Our 3D-Lashes eyelash extensions look and feel like your own lashes, only much longer, thicker, fuller, and more sexy! It enhances your eyes and makes you always look beautiful.
